Repository: https://github.com/jpagan2/julio-pagan-HW-3 Difficulties:

- It was challenging to figure out the appropriate way t separate packages
- Developing test cases for all the java classes was also a challenge
- It was a challenge to come up with the logic code to perform the improvement
- Gradle is working more efficiently since using it for previous assignments, so the build process has been expedited for this

Status: Completed

Lines of code in main = 125
Lines of code in test = 116
Unit test coverage: 100%

Test Summary

10	0	0	0.046s	100%
tests	failures	ignored	duration	successful

Packages   Classes

Package	Tests	Failures	Ignored	Duration	Success rate
test.java	10	0	0	0.046s	100%

Test Summary

10	0	0	0.046s	100%
tests	failures	ignored	duration	successful

Packages   **Classes**

Class	Tests	Failures	Ignored	Duration	Success rate
test.java.ButtonTest	2	0	0	0.037s	100%
test.java.LightbulbTest	2	0	0	0.003s	100%
